## White people to be exempt f

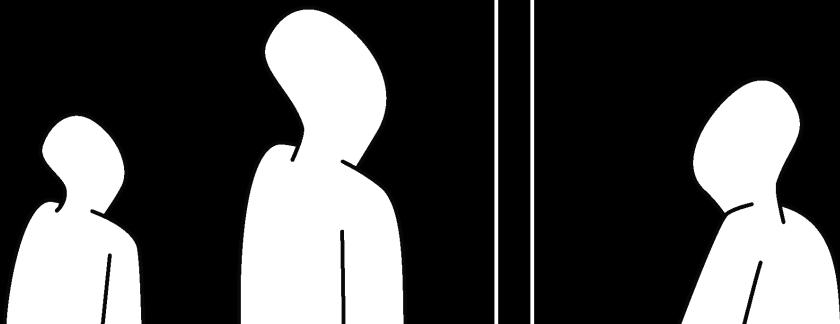

A new law is being introduced in the State of Wisconsin. Backed by a 87.0% percentage of Wisconsin citizens, this new law exempts non - Hispanic White people from facing murder charges when killing people of color. "Enough is enough" comments Kyle White, head of the White People's Militia Against Non - White People(WPMANWP) and ex-policeman,"we will not keep being brought to charges for protecting our righteous racial superiority. The State of

Wisconsin has finally understood that. The Law will once again prevail." When questioned about the possible demonstrations and outcry, Kyle commented "[...] since the New Year we will use the power of the Law to democratically enforce our birthrights. Demonstrators will be shot on sight. The Wisconsin Police Force has announced that after the legislation is passed, it will support the Militia by providing bottles of drinking water.
