Raspberry Pi

Model B

Released in February 2012, the Raspberry Pi Model B was the credit card-sized computer that started it all.

Visit Zinez.xyz to find out more

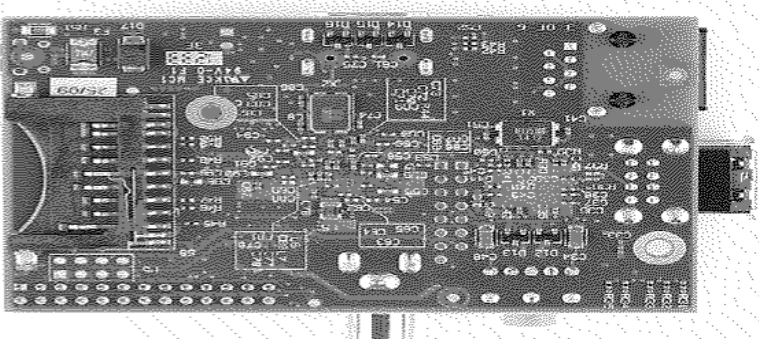

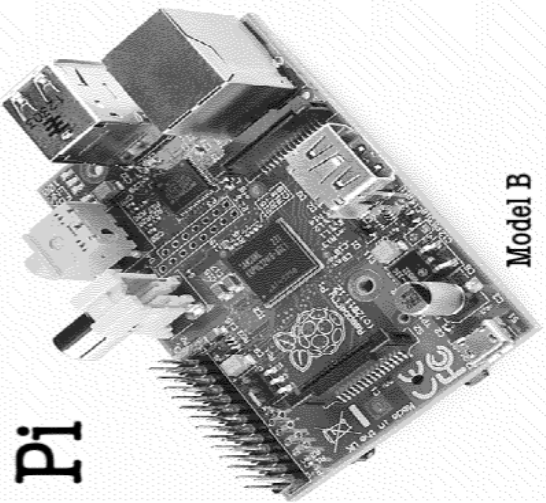

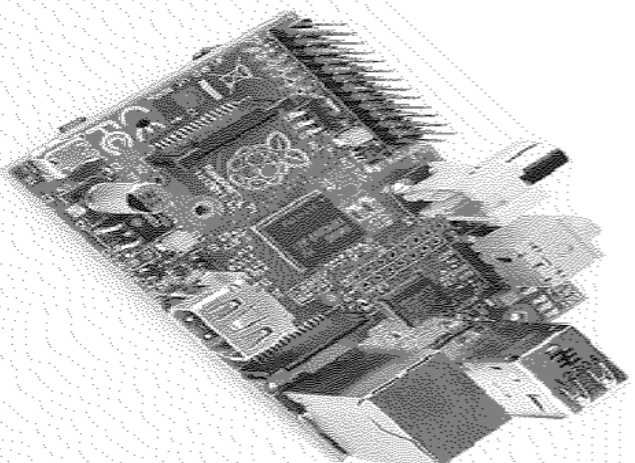

* Find a Raspberry Pi

* Get an SD card

* Use the Raspberry Pi Imager App to flash the operating system

* Install Apache2, PHP

* Clone the repository from GitHub into the /var/www/html folder

* Put your server online by connecting it to your router
